

SQL Statement:

```
SELECT Orders.OrderID, Employees.EmployeeID, Employees.FirstName
FROM Employees
INNER JOIN Orders
ON Orders.EmployeeID = Employees.EmployeeID
WHERE FirstName='Steven';
```

Edit the SQL Statement, and click "Run SQL" to see the result.

Run SQL >

Result:

Number of Records: 11

OrderID	EmployeeID	FirstName
10248	5	Steven
10254	5	Steven
10269	5	Steven
10297	5	Steven
10320	5	Steven
10333	5	Steven
10358	5	Steven
10359	5	Steven
10372	5	Steven
10378	5	Steven
10397	5	Steven
